

## Take control of your network with *AT&T Managed Internet Service*

*AT&T Managed Internet Service (MIS) provides reliable dedicated Internet access to help keep you connected with applications, data, customers and employees. It easily scales with a variety of access speeds and management options.*

## *The power of ethernet based MIS*

### Higher speed availability

Upload & download speeds up to 1Gbps.

### Ability to scale

Multiple speed options that can be changed as your needs grow.

### Hi-cap flex option

Customers with seasonal needs can control their bandwidth.

*Bypass traffic on the public Internet, from end-to-end*

### *Performance*

Fast, symmetrical, reliable and uninterrupted Internet access.

### *Agility*

Access to information and applications from virtually anywhere, anytime.

### *Flexibility*

Flexible management options let you supply & manage your own router or we can do it for you.

# \$120 billion

*invested in our networks over the past 6 years (2009-2014)*

## Get on the award-winning AT&T network
